Professional Summary

Petroleum Engineering graduate turned Frontend Developer with a unique analytical mindset and problem-solving approach. Experienced in building responsive web applications using modern frameworks like React, Next.js, and Angular. Currently contributing to the development of MokoHost, a comprehensive website hosting platform, where I combine technical expertise with user-centered design principles to create seamless digital experiences.

Personal Projects

Crown Clothing

[Personal Project](#) | [GitHub Repository](#) | [Live Demo](#)

Built a full-featured e-commerce web application using React and JavaScript. Features include product catalog, shopping cart functionality, and user authentication.

Demonstrates proficiency in component-based architecture, state management, and modern JavaScript development practices for commercial web applications. Deployed on Vercel for production accessibility.

Interactive Comment Section

[Personal Project](#) | [GitHub Repository](#) | [Live Demo](#)

Developed a dynamic interactive comment system using pure CSS3 and vanilla JavaScript, demonstrating strong fundamentals without framework dependencies. Features real-time comment posting, reply threading, vote functionality, and responsive design.

Heart Scan

[Personal Project](#) | [GitHub Repository](#)

Developing a machine learning-powered web application that analyzes user health data to predict heart disease tendency. The project combines frontend development with machine learning algorithms using Jupyter Notebook for model development and training. Built with HTML5 and Tailwind CSS for responsive design, with ongoing integration of ML models for predictive analysis.

Personal Portfolio

[Personal Project](#) | [GitHub Repository](#)

Designed and developed a responsive portfolio website using TypeScript to showcase professional work and technical skills. Features modern web design principles, smooth animations, and optimized performance.

Professional Experience

Frontend Developer

[MokoHost](#)

Lead frontend development for a website hosting platform, creating intuitive user interfaces and responsive web applications. Collaborate with cross-functional teams to deliver high-quality features that enhance user experience and platform functionality. Implement modern web technologies and best practices to ensure optimal performance and scalability.

Education

Bachelor of Engineering - Petroleum and Gas Engineering

[Federal University Otuoke](#)

2018 - 2024
